Because of unclear type designations in the taxonomical description, type specimens of seven Amazonian Diaptomidae species and one Bosminidae species were listed as syntypes in the Systematic Entomology Collections of the Instituto Nacional de Pesquisas da Amazônia - INPA) in Manaus, Brazil (cf. Ratcliffe & Penny, 1978; Rafael **et al.**, 1983).

The following type specimens of these species are herewith designated lectotypes or paralectotypes:
